Th-
This is...
(Waaah)
(Splash)
Really?
It's a contraption for arranging numbers in ascending order from the bottom step
Mm-hmm
(Bang)
That evening, the hina doll disappeared from the face of the earth

You're too forgetful
You wanna try?
I said it disappeared from the face of the earth
F3
(Thud)
F1
(Boom)

ビュー
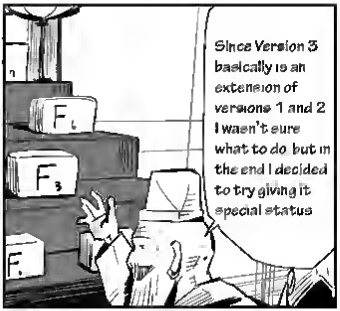
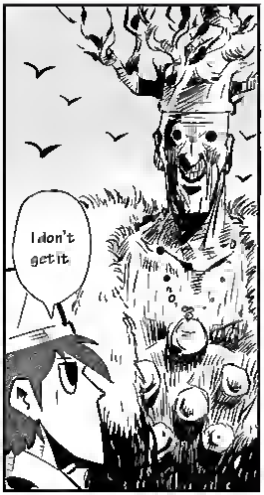
(Whizz Whizz)
Well, this isn't a vacuum…
You see how there's no sound in a vacuum?
Incidentally,
We wrote versions 1 and 2 recently
F1
F2
F3
F4
F5
F6
Version 1 and Version 2 are similar
The ways Fish numbers are made have similarities and differences between versions
Wait, you're not soaking it or eating it
ゴグ ゴグ ゴグ
(Glug Glug Glug)
Hmmm
You soak this in sake and then eat it
This has settled the definition firmly in one place

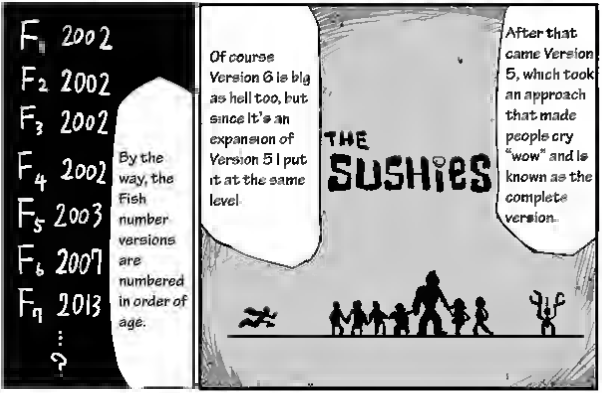


F1
F3
F2
Since Version 3 basically is an extension of versions 1 and 2 I wasn't sure what to do but in the end I decided to try giving it special status



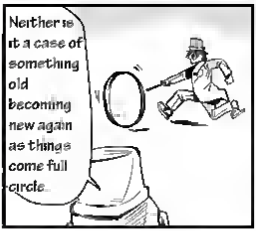
I don't get it

Actually, there was an older Version 3 too but it's not discussed much because its definitions were troublesome
F3

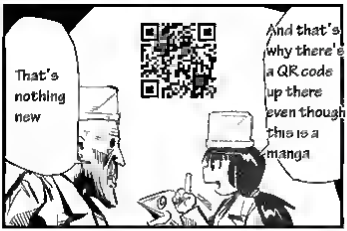


F1 2002
F2 2002
F3 2002
F4 2002
F5 2003
F6 2007
F7 2013
...
?
By the way, the Fish number versions are numbered in order of age.
Of course Version 6 is big as hell too, but since it's an expansion of Version 5 I put it at the same level
THE SUSHIES
After that came Version 5, which took an approach that made people cry "wow" and is known as the complete version.

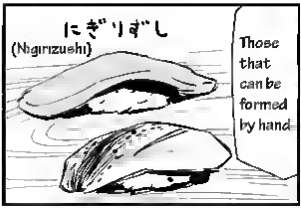
We'll need to introduce a new concept to look at the features common to these.
F4
F7
So you should be able to infer from the lineup that although Version 4 is old it is quite big and is a close relation of the latest Version 7



Neither is it a case of something old becoming new again as things come full circle

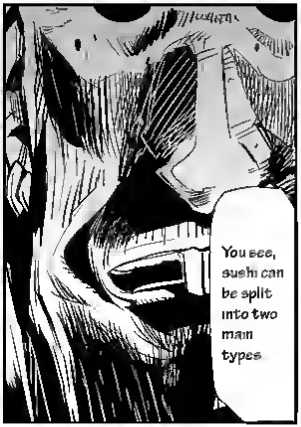


That's nothing new
And that's why there's a QR code up there even though this is a manga

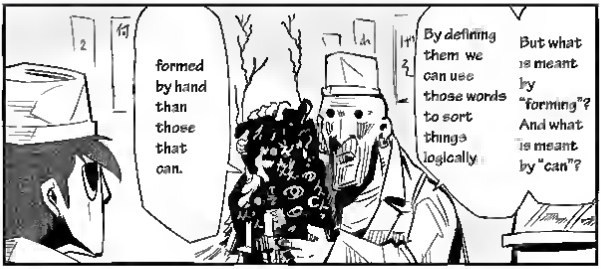


にぎりずし
(Nigirizushi)
Those that can be formed by hand

(Chirashizushi)
ちらしずし
なれずし
(Narezushi)
And those that cannot
Beyond Sushi

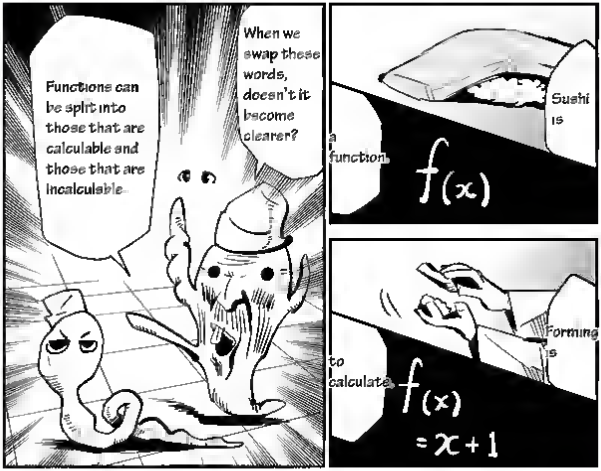


You see, sushi can be split into two main types

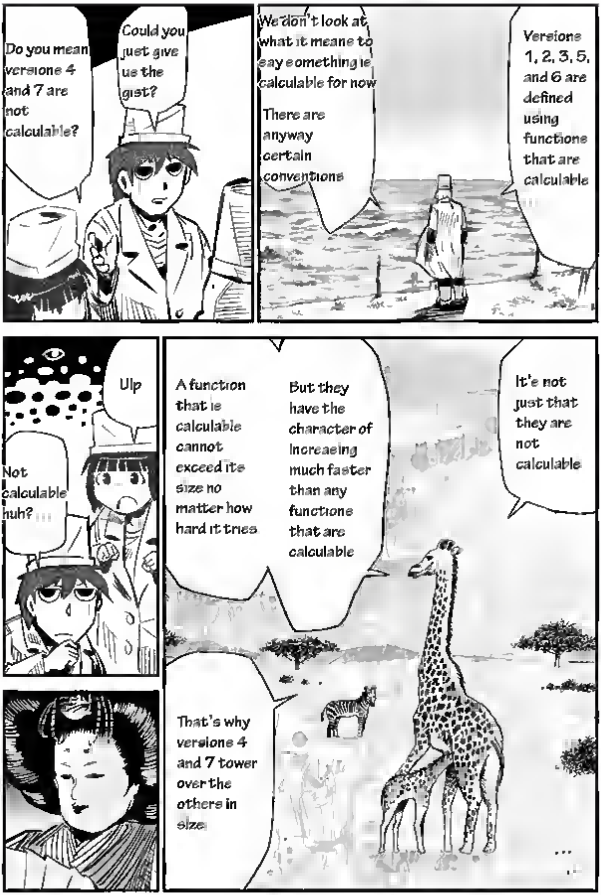


formed by hand than those that can.
By defining them we can use those words to sort things logically
But what is meant by "forming"? And what is meant by "can"?

(Clap)
OK



When we swap these words, doesn't it become clearer?
Functions can be split into those that are calculable and those that are incalculable
Sushi is a function.
$f(x)$
Forming is to calculate.
$f(x) = x + 1$



Do you mean versions 4 and 7 are not calculable?
Could you just give us the gist?
We don't look at what it means to say something is calculable for now
There are anyway certain conventions
Versions 1, 2, 3, 5, and 6 are defined using functions that are calculable
Ulp
Not calculable huh? ...
A function that is calculable cannot exceed its size no matter how hard it tries
But they have the character of increasing much faster than any functions that are calculable
It's not just that they are not calculable
That's why versions 4 and 7 tower over the others in size
...

DON'T FORGET TO LEAVE A FEEDBACK.
THIS REDRAW LOOKS GOOD TO YOU, BURGHF
YEAH SHUU, BUT IT NEEDS MORE REDRAWS HERE AND THERE AND THIS
PROOFREADS DONE!, TYPESET THIS PLEASE.
ROLL UP THE NEXT UPDATE!
RAWS... MEAT?
HMMM...
TRANSLATIONS HERE I COME!
SCRIPTS
SEE YOU IN THE NEXT UPDATE~!
